I talked to Victor this morning about his format for the action descriptions. He said that he wanted to get feedback from Dick and Lester but faxed me a copy anyway. I put it on your chair. I also talked to Loren who faxed me a copy of his detailed notes, also on your chair. I called Jeff Kishel hasn't finished his notes yet, but gave me a verbal summary of changes to action categories.

Recovery of T&E species seemed to involve only data collection and the group thought that it should be incorporated into other action categories involving restoration of habitat.

Establishment of Integrated HMP seemed to involve only preparation of plans and it should be incorporated into other action categories as well.

The group labored to establish definitions for some categories which didn't have descriptions. They failed, so there weren't any other changes.
